LOGGING IN THE WOMBAT FOREST

"The management of the Wombat Forest is driven by timber and woodchips, with little long-term consideration for rare flora and fauna, water catchments or tourism. At the current rate of overcutting, many experienced bush workers believe there will be no meaningful sawmill industry left within ten years."
-Wombat Forest Society

VS

"The Wombat is a beautiful forest, producing clean air, clean water, flora and fauna habitat, recreation and timber, professionally managed on a sustainable basis."
-Mr Norm Huon, Executive Director, Victorian Association of Forest Industries, press release, 24/6/94.
